Cloud Native Austria

Verein zur Förderung Cloud Nativer Technologien in Österreich

SPONSOR Information

More than Kubernetes, Cloud Native technologies

"Cloud Native technologies empower organizations to build and run scalable applications in modern, dynamic environments across public, private, and hybrid clouds. Containers, service meshes, microservices, immutable infrastructure, observability or declarative APIs exemplify the cloud native approach."

ABOUT
Cloud Native Austria

Cloud Native Austria is a dedicated association committed to fostering vibrant local **communities across Austria**, centered around the adoption and growth of cloud-native technologies.

As a hub for innovation, collaboration, and knowledge sharing, we strive to connect developers, engineers, and technology enthusiasts passionate about building scalable, resilient, and modern cloud-based systems.

Our efforts have been highlighted by successfully hosting **Kubernetes Community Days (KCD) Austria** twice, creating a platform for learning, networking, and exchanging ideas among experts and newcomers alike.

Through **meetups, workshops, and events**, we aim to empower Austrian professionals to embrace the future of cloud computing and contribute to the global cloud-native ecosystem.

Cloud Native Austria currently supports communities in Innsbruck, Graz and Vienna.

We semi-regularly host independent events throughout all of Austria, especially in regions without established local communities.

About

KCD Austria

On **October 8th** to **October 10th 2024**, the Kubernetes and Cloud Native community gathered in Austria (Vienna) for **one full day of workshops** (8th of October) and a **two-day technical conference** (9th/10th October) loaded with exciting talks and plenty of opportunities for growing and networking.

The event was built for developers, system engineers and all IT professionals interested in **Cloud**, **DevOps**, **Kubernetes** and **Cloud Native technologies**.

With more than 300 attendees, KCD Austria 2024 was **Austria's biggest CNCF event**.

WHAT
YOU CAN EXPECT

AS A SPONSOR

The value of being part of a community is a key element of the marketing strategy for many players in the Cloud Native space. With a capacity of ~20 meetups in 2024, we want to give an opportunity to companies to contribute and share their journey with the Austrian Kubernetes and Cloud Native communities.

Sponsoring Cloud Native Austria will bring you many benefits

- Position your brand as a strong impactful player in the Cloud Native space
- Networking opportunities with quality targeted attendees during the events
- Associate your brand with one of the fastest-growing technology communities
- Extend your organization's visibility to the developers, system engineers, architects & technical leaders in the Austrian tech community
- Support and engage with the ecosystem around the most popular Open Source projects

COMMUNITY SPONSORS

PACKAGE PRICE: **1000,-€**

Sponsors are important contributors to Cloud Native Austria.
We'll make sure you have visibility on our website and you'll
get visibility on our social media appearances.
We will mention your company at each Cloud Native Austria
event and each meetup that is sponsored by Cloud Native
Austria.

Social Media appearance
for each CNA sponsored event

Extended Logo Placement at our website
and if possible on-site
